

## Exercise 3: CSS

Upload a zip file named `yourName.USPnumber.zip`. Include a PDF file with the answers to the questions and 2 folders, `question1` and `question5`, with the files related to these 2 questions.

1. Upload all files you created when you followed the CSS3 course from lessons 1 - 30. In each file, whenever possible, change the names used in the files so the resulting page is not exactly the same as the one used in the course (or by other students).
2. What is the difference between margin and padding?
3. What is the correct way to specify values for the 4 different sides for padding?
4. Assuming that multiple elements in an HTML page belong to the classes `btn` and `green`. What is the correct selector to apply a style only to elements from both classes?
5. Using the `index.html` file available with this exercise:
  - a. Modify the file using your personal information
  - b. Add a `style.css` file to make your page similar to the figure below. Feel free to choose colors and image/font sizes, but keep the structure shown in the figure.

### Moulin Rouge

The film tells the story of a young English poet/writer, Christian, who falls in love with the star of the Moulin Rouge, cabaret actress and courtesan Satine. It uses the musical setting of the Montmartre Quarter of Paris, France

### Your Name

Your Name tells the story of Taki, a high school boy in Tokyo and Mitsuha, a high school girl in a rural town, who suddenly and inexplicably begin to swap bodies.

### Crank

The plot centres on a British hitman in Los Angeles named Chev Chelios who is poisoned and must keep his adrenaline flowing constantly in order to keep himself alive. He does so by various methods including taking drugs and getting into fights, while he tries to track down the man who poisoned him.
