

Exercise 2: HTML

1. Upload all files you created when you followed the HTML5 course from lessons 1-11 and 15-24.
In each page, change some names used in the html so the page is not exactly the same as the one used in the course (or by other students).
2. Create a HTML page presenting yourself to the rest of the class. It must have:
 - a. Paragraphs `<p>`
 - b. Links to other pages
 - c. Images:
 - i. At least 4
 - ii. Same width and height
 - iii. Some of them must have links too
 - d. At least 3 `<div>`s
 - i. They should be used in a coherent way to divide your page

Good Luck!
